Compliments of FRESS

A File Retrieval and Editing SyStem

Release 9.1   2 MAY 79

GRID ALTER code
Format is !+GRID<subgrid>,...,<subgrid>+
where a subgrid is
<vert iter>(<horiz iter><symbol><horiz expan>)<vert expan>

          Summary of the vertical and
       horizontal expansion characters.

          Meaning of column headings:
                          S -- symbol
                  C -- grid characters
       H -- horizontal expansion character
         V -- vertical expansion character

S	C	H	V
A	⌐	—	│
B	┬	—	│
C	⌐	∅	│
D	├	—	│
E	┼	—	│
F	┤	∅	│
G	└	—	∅
H	⊥	—	∅
I	⌟	∅	∅
∅	∅	∅	∅
-	-	-	∅
│	│	∅	∅

SPECIAL CHARACTERS

          !! literal exclamation point (!)
          !¬ literal "not" character (¬)
          !/ literal percent (%)

     The following is a list of other FRESS control characters and their form
code representations:

!74	¢	!123	#
!80	&	!124	@
!108	%	!126	=
!109	_ underscore	!127	"
!111	?		

     The following is a list of special characters available on the 1403 li
printer with TN print chain but not represented on a standard 2741 or Dat
terminal:

!96	-	minus	!175	•	
!139	{	left brace	!176	⁰	superscripts
!140	≤		!177	¹	
!141	⁽	superscript (	!178	¹	
!142	⁺	superscript +	!179	³	
!143	┼	line intersection	!180	⁴	
!155	}	right brace	!181	⁵	
!156	◈	lozenge	!182	⁶	
!157	⁾	superscript)	!183	⁷	
!158	±		!184	⁸	
!159	■	box	!185	⁹	
!160	⁻	superscript -	!187	⌟	lower right corner
!161	°	degree sign	!188	⌐	upper right corner
!171	└	lower left corner	!189	]	right bracket
!172	⌐	upper left corner	!190	≠	
!173	[	left bracket	!191	—	horizontal line
!174	≥				

EDIT and ALTER Codes

In the following definitions, n means n characters; m means m lines; x is a t index number; L R C means left or right justified or centered. < > means optional parameter, choices are separated by blanks. '

-EDIT CODES-

Bn<,m>	Draw box n by m
C	Center line
E	End heading
F<i>	Begin footnote; footnote counter is i; Next F ends the footnote
Hi	Begin heading; i is
	1 Caps, underscored, new page
	2 Caps, underscored
	3 Caps
	4 Underscored
	5 Caps, underscored, skip one line before
	6 Underscored, skip one line

	before
In	Begin new line and indent spaces
Jn	Hanging indent of n spaces
K<m>	Conditional page
N<i><C R>	New page or new column (C reset page counter is i; R means roman numeral pa numbers
P	New paragraph
R	Revision bar until next R
S<m>	Skip m lines
T<*n x><L R C><,fill ,fillnum>	Tab
U<*n x>	Justified tab

+ALTER CODES+

B<H L U>	Underscoring blank mode
	H heading blanks only; default
	L do not underscore blanks
	U underscore all blanks
COLUMNi	i is the number of columns; default is 1
DATE<1 2>	Print the date
	1 is numeric; 2 is alphabetic.
DEPTHm	number of lines per page; default is 66
DIn	Set decimal label level increment; default 3
GUTTERn	spacing between columns; default is 3
HEAD<A B>	Select heading table; default is B
	For headings 2, 3 and 4, table A skips fewer lines
HEADi=a,m,mm...<;i=a,m,mm>	
	reset heading table B ; a can be the sum of: 32 underscored, 4 caps, 1 new page, 0 none
	m lines are skipped before and mm lines are skipped after the heading
JUSTCi;Li or	
JUST<Ci Li>	Column and line justification; default C0,L0
	C0 widow elimination, padding and balancing
	C1 no column padding
	C2 no widow elimination
	C3 no column balancing
	L0 fully justified lines
	L1 bell justification
	L2 text set flush left with ragged right margin
	L3 text set flush right with

	ragged left margin
MARGIN<ln><,<rn><,<tm><,<bm>>>>	Left, right, top and bott margins of a full page column; default is 0,0,9,6
OFFSETn	leave n space offset inside margin; default is 0
PAGE<n><,m>	Reset output buffer; default is 110,66
PARA<n><,m>	Indent n spaces and skip m lines for each -P default is 5,1
SETTABx=n<L R C>...<;x=n<L R C>>	Reset default tab setting default is every 10 spaces
SPACEm	m is 1, 2, or 3 for singl double, or triple spacin default is 1
TABLE<x=n,nn<L R C>>...<;x=n,nn<L R C	n and nn are the left a right boundries of an entr default is !+TABLE+
TITLEa<=m<L R C>>+<title string>	title string is printed every page a is character indicati title string
TOFC<i<=n>>...<;i<=n>>	i is the heading level to included in the table contents; n is t indentation level; default all levels
WIDOWm	Lines allowed to stand alo at the top and bottom of column; default is twice t current spacing value
WIDTHn	n is the page width; defau is 65
